**MARKET GLENN CELEBRATES ONE YEAR OF SERVICE**

Glenn County Cooperative Extension's "Market Glenn" website was initiated in early 2006 to showcase local agricultural products and services. The purpose of the website was to bring producers and consumers together through a database of what was available in the county and where it could be found.

Over a year later, Glenn County Cooperative Extension is pleased with the continued growth of Market Glenn. The number of listings on the site has swelled to over 50 entries offering anything from orchard services and olive oil to mandarins and meat goats. Daily viewing by the public has remained steady as well. Individual listings averaged nearly 900 visits last year.

Navigating the website for a specific interest is made easier with the goods and services being broken down into six separate categories – Horticultural Crops, Field Crops, Dairy and Cheese, Livestock, Custom Farming Services, and Specialty Products. Each category is composed of a list of entries with contact information for a quick print-out if needed. Coupled to the entries are more in-depth summaries about the product or service and in some cases links to websites for more information.

There will be no endorsement of any products by Glenn County Cooperative Extension. There is no charge for this service. If you are an agricultural grower or service provider, we encourage you to fill out the enrollment form available at our office, by mail or through accessing our website at <http://ceglenn.ucdavis.edu>. Company logos, pictures, graphics, etc., can be posted and are preferred. You will be able to update your listing information by contacting our office or during the annual renewal. Please give us a call at 865-1107 if you have any questions.
