

THIRD THURSDAYS: THINGS FROM THE FIELD

WHAT IS IT?

A new, recurring event for 2024 to meet the newest Sac Valley orchard advisors in a casual setting and get timely updates on things we've been seeing in the field. Bring questions and pictures and comments!

ALMOND VARIETY & ROOTSTOCK SELECTION

Hear UCCE Farm Advisor Luke Milliron present the most recent findings from regional almond variety and rootstock trials. Learn about advantages and disadvantages of new varieties and how to select a variety-rootstock combination for your field.

ROUND TABLE

After the variety and rootstock discussion, we'll open the floor to discuss issues and concerns from the field for all tree crops. Bring your questions, observations, photos and more for an open forum of growers, PCAs, industry members and farm advisors.

Lunch generously sponsored by

AT A GLANCE
