

Olive Mechanical Harvester Demonstration

We will be harvesting our mechanical harvest trial at Nickels Estate in Arbuckle September 30 - October 2nd. Harvesting activities will probably begin between 9:00 and 10:00 a.m. each day.

Different machines will be run each day. The schedule follows.

September 30th - AgRight Olivia over the row canopy shaker
October 1st - Coe canopy shaker
October 2nd - Nielsen trunk shaker with two different shaking heads.

You are invited to come observe these machines in action on these specially prepared trees. We ask that you be mindful of the machines and try not to disrupt the researchers when they are collecting data. It is expected that the researchers will be available around the noon hour to answer questions.
